Ponneri, Thiruvallur Tamil Nadu

https://www.linkedin.com/in/shankar-j-480059210

DOB: 29/07/2002

EDUCATION

- B.E- Mechanical Engineering- College of Engineering Guindy (Anna University), Chennai (2022-2025) CGPA- 7.62
- DME- Mechanical Engineering- Sri Durga Devi Polytechnic college, Kavaraipettai (2018 - 2021) Percentage- 97 %
- SSLC- St.Gabriel's Higher Secondary School, Chennai (2018) Percentage- 84.2%

TECHNICAL SKILLS

- PTC Creo
- Catia
- Auto Cad
- Microsoft Office

SOFT SKILLS

- Adaptable
- Leadership
- Initiative

LANGUAGES

- English
- Tamil

TECHNICAL QUALIFICATION

- ASNT LEVEL – II (VT, RT, UT, LPT & MPT

PROFILE

Mechanical Engineer with 2 years of experience in Quality Inspection and Third-Party Inspection (TPI) for industrial and Oil & Gas projects. Experienced in material, welding, dimensional, and painting inspections. Skilled in reviewing engineering drawings, QAP/ITP, and quality documents to ensure compliance with project requirements and quality standards.

EXPERIENCE

Company : IRclass Systems and Solution Limited
Designation : Engineer.
Experience : OCT 2025 – Present

ROLES & RESPONSIBILITY

- Performed independent third-party inspections at vendor premises in accordance with approved ITPs, QAPs, project specifications, client requirements, and international codes & standards.
- Conducted incoming material, in-process, stage-wise, final, and pre-dispatch inspections for fabricated and manufactured equipment.
- Reviewed and verified quality documents, drawings, specifications, and applicable inspection requirements.
- Witnessed and monitored NDT activities including VT, PT, MT, UT, RT, PMI, and Hardness Testing as per applicable standards and project requirements.
- Monitored welding activities and ensured compliance with approved welding procedures, material specifications, and code requirements.
- Verified material traceability, heat number transfer, identification markings, and compliance with approved material specifications.
- Performed dimensional inspections using calibrated instruments and verified compliance with approved drawings, datasheets, and technical specifications.
- Witnessed hydrostatic, pneumatic, leak, functional, and performance testing activities and reviewed associated test documentation.
- Identified non-conformities, issued inspection observations, and followed up on corrective and preventive actions to ensure compliance.
- Prepared detailed inspection reports, release notes, punch lists, surveillance reports, and final inspection documentation for client approval.

ACHIEVEMENTS

- Certification of Appreciation from BGR Energy Systems Ltd.
  For ensuring quality & dispatch operations of tube bundle assembly – IOCL Baruni Project (Apr 2022)

NDT EXPOSURE

- Visual Testing (VT)
- Liquid Penetrant Testing (PT)
- Magnetic Particle Testing (MT)
- Ultrasonic Testing (UT)
- Radiographic Testing (RT)
- Positive Material Identification (PMI)
- Hardness Testing

STANDARDS & CODES EXPOSURE

- ASME (Section II, V, VIII, IX)
- API (API 510, API 570, API 650, API 620)
- ASTM International
- ANSI
- ISO STANDARDS
- NACE International / MR0175

INSECTION EXPOSURE

- Pressure Vessels
- Storage Tanks
- Valves
- Piping & Spools
- Heat Exchangers
- Skids & Packages
- Structural
- Mechanical Equipments
- Flanges & Fittings
- Forgings and Castings
- Raw Materials
- Gaskets
- Cut & Bend Steel bars
- Coating & Special Coatings
- Power Transmission Equipments

- Coordinated with clients, vendors, engineering teams, and project stakeholders to resolve quality and technical issues.

Vendor Assessment & Audit

- Conducted New Vendor Assessments (NVA) and Vendor Capability Assessments to evaluate manufacturing capability, quality systems, technical competency, and resource availability.
- Performed vendor audits covering quality management systems, welding controls, NDT practices, calibration systems, material control, inspection facilities, and HSE compliance.
- Assessed vendor compliance with project specifications, customer requirements, and quality standards.
- Prepared vendor assessment reports and recommended vendor qualification status based on audit findings.
- Monitored closure of audit observations and corrective action implementation.

Expediting & Manufacturing Surveillance

- Monitored manufacturing progress against approved production schedules and project milestones.
- Identified potential delays, manufacturing bottlenecks, and quality risks impacting delivery schedules.
- Coordinated with vendors and project teams to ensure timely completion and shipment of materials and equipment.
- Issued expediting reports, progress status updates, and delivery risk assessments to clients.

EXPERIENCE

Company : BGR Energy Systems Ltd (Division: Air Fin Cooler).
Designation : Quality Engineer.
Experience : September 2021 – September 2022

ROLES & RESPONSIBILITY

- Review of Customer Quality plan as per Code and Customer requirement
- Familiar with International Standards and code such as ASME SEC I, II, V, VIII div.1, IX,etc.
- Check the dimensions & quality and ensure that the final weld and fulfill the acceptance and criteria.
- Perform the Hardness testing & PMI testing (Positive material Identification
- Stage inspection during fabrication of equipment which includes dimension, orientation marking for nozzles, individual fit – up stage alignment of nozzle etc. as per the drawing
- Evaluation of liquid penetrate test, visual test, magnetic particle test, Ultrasonic testing, Interpretation of RT films
- Issue NCR when non-conformance is observed during inspection or verification
- Final inspection of completed equipment which includes final visual, dimension verification of material etc
- Witnessing of Pneumatic and Hydrostatic test activities
- Knowledge in material like CS,SS,DSS,INCOLOY
- Conducted Failure Mode and Effects Analysis (FMEA) to identify potential failure points in fabrication processes and implemented preventive actions to mitigate risks.

- Applied Six Sigma methodologies (DMAIC) to reduce defects and improve process capability, ensuring compliance with customer.
- Utilized 7 QC Tools for effective problem solving and continuous quality improvement
- Followed the PDCA cycle to drive process improvements, enhance productivity, and sustain quality performance on the shop floor.
- Investigate root causes of defects and implement corrective/preventive actions (CAPA)
- Preparing stage inspection reports and stage offer list for Third Party Inspection Authority.
- Reduce the rework by giving proper training and guide the team to working withgood quality.
- Coordinate with Customer, Authorized inspector & Third parties such as LLOYDS,NOV, TATA, L&T, BV, TUV, CEIL etc.
- Prepares the checklists for each and every activity related to quality.
- Preparation of quality data dossier submitting to client

DECLARATION

I, SHANKAR J do hereby confirm that the information given above is true to the best of my knowledge
